Paris, UE mobility

Driving license (category B)

SKILLS

Science

Data :

SQL (MySQL, PostgreSQL), dbt (ETL/ELT), Google BigQuery, Python (Pandas)

Visualization / BI :

Power BI (dashboards, DAX),
Lightdash, Looker Studio
Data storytelling & reporting

Project Management :

Agile SCRUM, Git

Automation & AI :

Workflows automation,
AI-assisted analysis,
No-code tools (Make, Airtable)

Languages

English : Fluent (5 years abroad)

Spanish : Intermediate

Creativity

Music and video editing : Ableton Live, Recordbox, Traktor, Adobe Premiere Pro

Analytics Engineer

« Analytics Engineer with a product-oriented approach, I design data solutions that help businesses understand their performance and make better decisions.. »

Professional Experience

Data Product : InsightFlow – E-commerce Analysis & Financial dashboard, March 2026

- Design and development of an end-to-end e-commerce data management product, integrating sales, marketing, and financial data
- Key indicators modeling (revenue, margins, CAC, LTV, cash burn, runway) using dbt/SQL on BigQuery, creation of interactive dashboards with Lightdash
- Implementation of scenario simulations (what-if) and automated recommendations (including AI-assisted analysis) to identify performance drivers and business risks

Data & Finance Project - Performance & Risk Simulation, February 2026

Developed an end-to-end financial analytics solution for an SME (café/bakery – 2022/2023) - monitoring key KPIs - seasonality analysis - financial risk anticipation via a simulation to support strategic decision-making

5 years International Experience - Working Holiday Visa - Canada, New Zealand, July 2019 to February 2024

Roles in hospitality, events and ski resorts - communication, autonomy, stress management, customer services in a multicultural environment

Software Engineer - Grade B - Capgemini Technology Services - Rennes (France), March 2016 to March 2019

- Technical leadership of a development team and enhancement of a web portal for social housing management.
- Application maintenance (TMA) for a cinema voucher service: KPI monitoring, incident resolution, functional improvements
- Design of an IoT portal : functional analysis, client interactions, DevOps and Agile practices

Internship - Website development for the Customer Testing Center (CTC) - Orange Business - Rennes(France), May 2015 to August 2015

Defined technical and functional specifications, mockups creation, web development and collaboration with cross-functional teams
